Improving Heart Failure Care

Call for **Research Proposals**

Last date for submission
February 28th 2022.

UPTO
5 LAKHS
FUNDING

HFAI has decided to call for research proposals for funding to be initiated in **the year 2022-23.**

The research proposal should strictly be related to Heart Failure and the study should have societal or scientific relevance which is of concern to our country. Proposals not related to HF will summarily be rejected.

The studies should be prospective, preferably multi-centric, either epidemiological, interventional or testing a hypothesis. Registry data collection and analysis also will be acceptable. It should have some novelty and not be a repetition or exact copy of study done elsewhere.

Any Indian Citizen with DM/DNB degree in cardiology can apply. There is no age limit. The submission is open to DM / DNB trainees also, if it is supported by the department and supported by one consultant as Co-PI.

Proposals should be submitted in two soft copies. In one of the copies, please remove all the identifiers eg. name of the Institution(s), name of the investigator(s), 'the study will be recruiting patients attending XYZ hospital etc'.

So that it will help in reviewing the projects in a blinded fashion by the committee. Those who are interested to submit proposal, please visit hfai.co.in and email to hfaioffice@gmail.com on or before February 28th 2022.

The research should start within 6 months, otherwise the fund will be allotted to the next person.

Dr. Harikrishnan S
President

Dr. Abraham Oommen
Secretary
