*Medicine is learned by the bedside and not in the classroom. Let not your conceptions of disease come from the words heard in the lecture room or read from the book. See, and then reason and compare and control. But see first.'*

**Sir William Osler, 1849 - 1919**

Dear Colleagues,

Adapt we must, to change. The Heart Failure Association of India (HFAI) is happy to announce the beginning of a new academic voyage in tune with the prevailing online wind – The Heart Failure Clinics. The program aims to provide a comprehensive understanding of the Heart Failure (HF) spectrum, guided by eminent teachers from all over the country.

The course is designed to offer a postgraduate/fellow-friendly learning e-atmosphere that will not only be exam oriented, but also practice oriented. Over a series of monthly sessions spread over a period of 10 months, major academic institutions will be hosting scientific content pertaining to both adult and pediatric HF that will be streamed live to DM/DNB postgraduates/fellows in Cardiology. Each session is planned to have four components – a lecture, case presentation, take-home messages and an educative interactive component “**Ask the examiner**”. The series will end with a mock practical examination in the 11th session, including a long case, short case and mock viva with spotters.

Our way of life and scientific discourse have changed much. But the chain of learning must continue unabated. Inviting everyone to join us in this journey to see, understand, demystify and conquer the realm of Heart Failure.

Warm regards
